

March

Cannot believe how fast February flew but March will be tons of fun. On Friday March 2 we will be celebrating Dr. Seuss's birthday. The first two-week of March we will be getting lost in space. The first week we will be learning about all the planets. The student will be collecting data on each planet and making their own planet books. We will be making the planets out of Paper Mache. The next week will be leaning about the sun, moon, and the constellations. Also during that week the students will be inventing their own spacecrafts. We will be using recycled items such as different kinds of boxes, egg cartons, milk cartons, water bottles, paper towel rolls etc. If you have any of those items feel free to bring them. All of our inventions and creations will be put on display for the art show in April.

Conferences will be held from March 12-16th. The sign up sheet is hanging up outside the classroom. If the week doesn't work for you please let me know. On the 16th we will be making rainbow cookies for St. Patties day.

The third week of March we will be learning about the weather. The students will be making their own weather patterns. The final week of March we will be welcoming Spring. We will start our own little garden. We will be exploring the plant life cycle. On Wednesday the 28th we will be having a spring brunch. I will put a sign up sheet outside the classroom for the party. Spring Break will start Friday 30th till April 6th. School will start back up again on April 9th. I hope you all have a fun spring break!
