

# March

Cannot believe how fast February flew but March will be tons of fun. We have many fun things planned. **Conferences will be the week of March 11<sup>th</sup>- 15<sup>th</sup>.** **Sign ups are outside the classroom.**

We will kick off the month learning about Dr. Seuss. The entire school is participating in a Dr. Seuss competition to vote on the best book. There will be a bracket in the main hallway. There you will be able to see which books are going against each other. We will also be visiting Mrs. D and Ms. Colleens classroom and to read some of the books and help teach our younger friends.

The next week will be become Paleontologists and learn all about our favorite dinosaurs. Each day we will learn about a different dinosaur and collect data for our dinosaur books. We will also find out how many of us can fit in a T-Rex footprint and invent our own dinosaurs.

The third week we will be exploring weather and spring. We will make our own weather (tornados, rain and rainbows). There will also be little St. Patty's celebrations! We will be making some edible rainbows and leprechaun house to catch the tricky little guy. The Students will also be getting ready for our trip by getting out tickets and passports ready for our flight to AUSTRALIA on that Friday. The last week of March and the first week of April we will be traveling all over the continent. I will send more information about our trip shortly.
